

AMENDMENT

Amendments to the Specification

An amendment of the written description is presented under the heading
“AMENDMENTS TO THE SPECIFICATION.”

AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph beginning on line 24 of amended sheet 3B of the specification as originally filed (line 11, page 3 of the clean copy of the substitute specification filed February 17, 2009) with the following marked-up paragraph:

The excessive lubrication of the bearings leads to additional turbulence ~~stirling~~ losses, and the cooling oil is moreover heated in this bearing, as a result of which the shaft, which is irrigated by the oil, will be cooled less efficiently.
